

Solenoid pumps 1228 series in plastic for viscous fluids

The plastic version of the Fluid-o-Tech® Mono solenoid pump is equipped with custom components, specifically designed to grant supreme performance and a high degree of compatibility with most of the fluids with a viscosity up to 400 cSt.

The innovative sealing system, the new piston highly resistant to corrosion and mechanical wear and the improved precision of the flow regulator make of this pump a remarkable product. The coil is made of self-extinguishing material with a class H insulation winding.

All the models are equipped with a noise suppression device which allows the pump to be installed in all those applications where low noise is a premium.

Shock absorbing supports are available for the quietest operation.

ELECTRICAL CHARACTERISTICS

	"IF" Coil	"IL" Coil
Voltage	120 V	230 V
Frequency	60 Hz	50 Hz
Power	70 W	70 W
Current	0.98 A	0.65 A
Approval	(UL) File E164244	(UL) File E164244

HYDRAULIC CHARACTERISTICS

- Self-priming
- Max viscosity: 400 Cst
- pH range: 6-8
- Max liquid temperature: 40 °C (104 F)
- No dry running allowed

Wiring diagram

Diode wiring diagram to follow when the pump is supplied without plug

Performance curves of solenoid pumps with different viscosity fluids
